

COMMERCIAL PITCH

Good morning, everyone. My name is Jefferson Cáceres, and I am the Scrum Master. First, let me introduce my team.

- **Cristian Ortiz** is our Frontend Developer.
- **Arley Diaz** is our Backend Developer.
- **Juan Gomez** is our Frontend Developer.
- **Edward Barrios** is our Backend Developer.
- **Jhon Salgado** is our Analista

1. Hook (Attention Grabber)

Have you ever visited a new city and felt lost?

Not knowing where to go?

What if one app could help you travel easily?

2. The Problem

Many tourists visit Barranquilla and Atlántico for the first time. They do not know where to go. They do not know how much money they need. This makes traveling difficult and stressful.

3. The Solution

Our solution is an app called **TurquiYA**. It helps tourists find new places to visit. Users enter their location, budget, and travel style. The app recommends the best places based on their preferences.

4. Target Users

This product is designed for tourists. Our target audience includes local and international travelers. It is especially useful for people visiting Barranquilla and Atlántico for the first time. It is also useful for hotels, tourism companies, and apartment or building businesses that welcome tourists. Transportation

companies, such as bus services, taxis, and tour guides, can also benefit from it.

5. Key Features

- **Feature 1:** Tourist map with attractions.
Benefit: Users can find interesting places easily.
- **Feature 2:** Travel plan with prices and transportation.
Benefit: Users save time and money during their trip.
- **Feature 3:** Local food recommendations.
Benefit: Users can discover the best local restaurants and traditional food.
- **Feature 4:** Currency exchange calculator.
Benefit: Users can know how much money they need to bring.

6. Technology Stack

The frontend was developed using HTML, CSS, and JavaScript. The backend is built with Supabase. We chose these technologies because they are fast, easy to use, and can grow with the project. The system is scalable because Supabase supports many users and makes it easy to add new features and expand to other cities or countries in the future.

7. Competitive Advantage

Unlike other travel apps, TurkiYA recommends destinations based on the user's budget. It includes information on transportation, prices, travel time, and local cuisine. All in one easy-to-use app.

8. Future Improvements

In the future, we plan to add more cities in Colombia. We also want to include more tourist attractions and new travel plans.

9. Call to Action

So, what are you waiting for? Visit our website at turquiya.dpdns.org today! Create your free account, plan your trip, and discover the best of Barranquilla and Atlántico. TurkiYA is ready to help you travel smarter. Try it now!

10. Strong Closing Statement

We believe that TurkiYA can help many tourists enjoy their trips. This project is more than just a travel app. It's a smart travel companion. Thank you for your attention!
